

## **NIIIT CONFERENCE PAPER STRUCTURE**

### **1. Title**

The title should be concise, informative, and reflective of the main focus of the paper.

### **2. Abstract**

A summary of the research, including the research problem, methods, key results, conclusion, and recommendations in one block paragraph of not more than 250 words. The abstract should be clear and informative to attract readers' interest.

Summary of your whole work from Introduction, Methodology, Result, Conclusion, and Recommendation in one block paragraph of not more than 250 words, stating the problem, how it is to be solved, method/technique used, result obtained, conclusion, and recommendation with a view to achieving the stated objectives

### **3. Keywords**

A list of 4–6 keywords that represent the main topics, theme, or sub-theme of the paper.

### **4. Introduction**

**Background:** Introduce the broader topic and context of the research, aligning to the scope of the study.

**Problem Statement:** Specify the research problem or question being addressed.

**Objectives:** State the aim and objectives of the study.

**Significance:** Explain the importance of the research, the gaps it fills, or its contribution to the field.

**Research Hypothesis:** Outline the central argument or hypothesis guiding the research (if applicable)

### **5. Review of Related Studies**

**Summary of Existing Research:** Provide an overview of key recent, related, and relevant findings in the field related to your topic.

**Gaps in Knowledge:** Identify areas where previous research is lacking, leading to your research question, with your study bridging the gap.

### **6. Methodology**

**Research Design:** Explain the approach used (e.g., qualitative, quantitative, mixed methods).

**Data Collection:** Describe how the data were gathered (e.g., experiments, surveys, case studies).

**Analysis:** Specify the tools or techniques used for analyzing the data (e.g., statistical methods, coding techniques).

**Ethical Considerations:** If applicable, address any ethical issues related to the research (e.g., consent, confidentiality).

### **7. Results & Discussion**

**Presentation of Findings:** Clearly present the results of the research.

**Tables/Figures:** Use tables, graphs, or charts to visually represent data when necessary.

Statistical Analysis: Include any significant statistics or trends found during analysis (if applicable).

Interpretation of Results: Discuss the meaning of the findings in relation to the research question.

Comparison with Literature: Relate your results to previous studies. Did you find similar or different outcomes?

Implications: Discuss the broader implications of your findings for the field, policy, or future research.

## **8. Conclusion**

Summary of Key Points: Recap the main findings and their significance.

Limitations: Acknowledge any limitations of your study.

Future Research Directions: Suggest areas for further investigation.

## **9. Acknowledgments (optional)**

Recognize contributions from individuals, institutions, or funding bodies that supported the research.

## **10. References**

Citation List: Provide a complete list of sources cited in your paper, formatted according to the citation style required. The APA 7 should be used.

## **11. Appendices (optional)**

Include supplementary materials that are too lengthy to fit within the main text, such as raw data, detailed calculations, questionnaires, or additional figures.
